**MOBILE COMMUNICATION SYSTEM FOR
CONTROLLING SETTING UP A CONNECTION**

CLAIM TO PRIORITY

This application claims priority from German application number 19839016.5 filed on August 27, 1998 and from Patent Cooperation Treaty (PCT) application no. PCT/DE99/02696 filed on August 27, 1999.

TECHNICAL FIELD

The invention relates to a method and a mobile communication system for controlling the setting-up of a connection.

BACKGROUND

Mobile subscribers are able to move freely with their mobile stations even beyond the network boundaries of their home mobile radio network (roaming). However, when a subscriber is roaming into another visited mobile radio network, he cannot easily use call numbers well known to him from his home mobile radio network such as, for example, service numbers, hotline number, mailbox number, etc. since
